UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	Spletni in mobilni informacijski sistemi
Course title:	Web and Mobile Information Systems

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Informatika v sodobni družbi, visokošolski strokovni študijski program prve stopnje	-	Drugi ali tretji	Četrti ali šesti
Informatics in Contemporary Society, first cycle Professional Study Programme	-	Second or third	Fourth or sixth

Vrsta predmeta / Course type	Izbirni / Elective
Univerzitetna koda predmeta / University course code:	1-ISD-VS-IP-SMIS-2024-09-12

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
30	-	45	-	-	105	6

Nosilec predmeta / Lecturer:	Viš. pred. dr. Miljenko Hajnić

Jeziki / Languages:	**Predavanja / Lectures:**	Slovenski / Slovenian, Angleški / English
	Vaje / Tutorial:	Slovenski / Slovenian, Angleški / English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	**Prerequisites:**
Študent/študentka mora pred pristopom k izpitu pripraviti in zagovarjati seminarsko nalogo.	Prior to the exam, the student has to prepare and defend seminar work.

Vsebina:	**Content (Syllabus outline):**
• *Uvod*: opis predmeta ter splošnih informacijskih sistemov. • *Spletni informacijski sistemi*: opredelitev spletnih informacijskih sistemov, predstavitev najpogostejših arhitektur IS, prednosti in slabosti ter primeri dobre prakse. • *Mobilni informacijski sistemi*: predstavitev razlik v načrtovanju mobilnih in spletnih informacijskih sistemov, načrtovanje prožnih, razširljivih	• *Introduction:* description of the course and general information systems. • *Web information systems*: definition of web information systems, presentation of most common IS architectures, advantages, and disadvantages, as well as examples of good practice. • *Mobile information systems*: presentation of differences in planning mobile and web information systems, planning flexible, extendable, and ubiquitous

in vseprisotnih informacijskih sistemov. • *Računalništvo v oblaku:* opredelitev porazdeljenega računalništva v obliki oblaka, analiza rešitev in storitev na področju, pregled tehnologij, načini komunikacije ter souporabe informacij. • *Mobilni odjemalci:* predstavitev zmogljivosti mobilnih odjemalcev, analiza njihovih omejitev, načini komunikacije.	information systems. • *Computer science in a cloud*: definition of computer science aspects divided in a form of a cloud, solutions and services analysis in the relative field, technologies overview, manners of communication and co-use of information. • *Mobile customers*: presentation of mobile customer capacities, analysis of their limitations, ways of communication.

Cilji in kompetence:	**Objectives and competences:**
Učna enota prispeva k razvoju naslednjih splošnih in predmetno-specifičnih kompetenc: *Splošne kompetence:* • obvladanje raziskovalnih metod, postopkov in procesov • razvoj kritične in samokritične presoje • sposobnost fleksibilne uporabe znanja v praksi • sposobnost za reševanje konkretnih tehničnih in analitičnih problemov z uporabo ustreznih metod in postopkov • razvoj veščin in spretnosti pri uporabi pridobljenega znanja s pomočjo reševanja empiričnih problemov *Predmetno-specifične kompetence:* • razumevanje in obvladovanje temeljnih principov delovanja spletnih in mobilnih informacijskih sistemov • razvoj kritične in samokritične presoje uporabniških zahtev ter zmožnost samoiniciativnosti z namenom optimizacije le-teh • poznavanje metod, postopkov in	*The instructional unit contributes to the development of the following general and subject-specific competences:* *General competences:* • mastering research methods, procedures and processes • development of critical and self-critical judgement • ability to use the acquired knowledge in practice in a flexible manner • ability to solve technical and analytical problems using appropriate methods and procedures • development of skills and abilities by using the obtained knowledge for empirical problem solving *Subject-specific competences:* • understanding and mastering of basic operating principles of mobile and web information systems • development of critical and self-critical assessment capabilities in relation to user requirements and the ability to take initiative for the

procesov za načrtovanje, razvoj in vzdrževanje informacijskih sistemov • zmožnost izbire optimalne tehnologije za vzpostavitev informacijskega sistema ter obvladovanje tehničnih in tehnoloških omejitev	purposes of optimisation • familiarity with methods, procedures and processes relating to planning, development, and maintenance of information systems • ability to select optimal technology necessary for establishing an information system and managing technical and technological limitations

Predvideni študijski rezultati:	**Intended learning outcomes:**
Znanje in razumevanje: *Študentka/študent:* • pozna in razume osnove informacijskih sistemov • pozna in razume razlike med načrtovanjem ter razvojem spletnih in mobilnih informacijskih sistemov • demonstrira zmožnost identifikacije potrebnih komponent • prikaže razumevanje ter kritično ocenjevanje tehnologij za vzpostavitev ciljnega informacijskega sistema	Knowledge and understanding: *The student:* • knows and understand information system basics • knows and understands the differences between planning and development of web and mobile information systems • demonstrates the ability to identify necessary components • demonstrates understanding and the ability to critically assess technologies necessary for establishing a target information system

Metode poučevanja in učenja:	**Learning and teaching methods:**
• *predavanja*, na katerih se študentje spoznajo s teoretičnim ozadjem spletnih in mobilnih informacijskih sistemov, s primeri dobre prakse ter z reševanjem problemov. Pričakuje se aktivna udeležba študentov v obliki dialoga • *laboratorijske vaje* so namenjene krepitvi praktičnih izkušenj na področju načrtovanja, razvoja in vzdrževanja informacijskih sistemov	• *lectures* during which students are familiarized with theoretical backgrounds of web and mobile information systems, with examples of good practice and with problem solving. Active student participation in the form of a dialogue is expected • *laboratory practice* is intended for strengthening practical experience related to planning, development and maintenance of information systems

Načini ocenjevanja:	Delež (v %) / Weight (in %)	**Assessment:**
Način (pisni izpit, ustno izpraševanje, naloge, projekt):		Type (examination, oral, coursework, project):
• pisni in ustni izpit	50	• written and oral exam
• seminarska naloga	50	• student project
