

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Vizualizacija podatkov
Course title:	Data visualization

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Podatkovne znanosti, magistrski študijski program druge stopnje	-	Prvi	Prvi
The second cycle masters study programme Data Sciences	-	First	First

Vrsta predmeta / Course type Obvezni / Obligatory

Univerzitetna koda predmeta / University course code: 2-PZ-MAG-VP-2020-06-30

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
20	-	40	-	-	90	5

Nosilec predmeta / Lecturer: doc. dr. Nuša Erman

Jeziki / Languages:

Predavanja / Lectures:	Slovenski, angleški / Slovene, English
Vaje / Tutorial:	Slovenski, angleški / Slovene, English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Ni posebnih pogojev za vključitev v delo.

Pogoj za pristop k pisnemu izpitu je pravočasna oddaja in pozitivno ocenjena seminarska naloga.

Prerequisites:

There are no special prerequisites for the inclusion in work.

Student has to submit seminar work within the due time. If the seminar work is positively graded, he/she is allowed to write the exam.

Vsebina:

- Uvod v uporabo programskega okolja R: vrste podatkov v R, vektor, faktor, seznam, matrika, podatkovni okvir.
- Proučitev podatkov pred njihovo vizualizacijo.
- Načrtovanje vizualizacije: izbira ustreznega grafičnega prikaza.
- Vizualizacija z uporabo osnovnih R ukazov.

Content (Syllabus outline):

- Introduction to R software environment: data types in R, vector, factor, list, matrix, data frame.
- Exploring the data before visualizing them.
- Planning for visualization: selecting the appropriate graphic display.
- Visualization using R Base commands.

- Vizualizacija z uporabo izbranih R paketov (lattice, ggplot2).
- Dinamični in interaktivni prikazi s pomočjo R Shiny.

- Visualization using selected R packages (lattice, ggplot2).
- Dynamic and interactive displays using R Shiny.

- Erman, N.: Prosojnice iz predavanj in gradiva z vaj pri predmetu Vizualizacija podatkov. Moodle, FIŠ.

Cilji in kompetence:

Učna enota prispeva k razvoju naslednjih splošnih in predmetno specifičnih kompetenc:

Splošne kompetence:

- Sposobnost skrbeti za kakovost strokovnega dela skozi avtonomnost, samoiniciativnost, (samo)kritičnost, (samo)refleksivnost in (samo)evalviranje.
- Sposobnost fleksibilne uporabe znanja v praksi.
- Uporaba ustreznih metodoloških pristopov za izvajanje, koordiniranje in organiziranje raziskav.

Predmetno-specifične kompetence:

- obvladanje vizualizacijskih metod, postopkov in procesov
- sposobnost logičnega sklepanja, ocenjevanja velikostnega reda rezultata, natančnosti izražanja, pisanja in razmišljanja
- usposobljenost za uporabo sodobnih vizualizacij podatkov

Objectives and competences:

The instructional unit contributes to the development of the following general and subject-specific competences:

General competences:

- The ability to manage quality of professional work through autonomy, initiative, as well as (self-)criticism, (self-)reflection and (self-)evaluation.
- The ability of flexible usage of knowledge in practice.
- Utilization of adequate methodological approaches to conduct, coordination and organisation of research

Subject-specific competences:

- competence in visualization methods, procedures and processes
- ability to make logical conclusions, to estimate the order of magnitude of the results well as the ability to express oneself, write and think in an accurate manner
- ability to use modern data visualizations

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje:

Sposobnost študenta/študentke bo:

- poznavanje enega izmed najbolj prilagodljivih orodij za statistično analizo in grafični prikaz podatkov;
- sposobnost njegove praktične uporabe;
- poznavanje osnovnih in naprednih funkcij in pristopov k vizualizaciji podatkov.

Knowledge and understanding:

The ability of the student:

- acquaintance with one of the most flexible tools for statistical analysis and graphics of data;
- ability to use it in practice;
- knowledge of basic and advanced functions and approaches to data visualization.

Metode poučevanja in učenja:

- *predavanja* z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov)
- *vaje*, kjer študentje na enostavnih primerih ponovijo temeljne koncepte in metode, predstavljene na predavanjih
- *laboratorijske vaje*, kjer se študenti seznanijo s programskimi orodji za zbiranje in analiziranje podatkov

Learning and teaching methods:

- *lectures* with active students participation (explanations, discussion, questions, examples, problem solving);
- *tutorials* (students will recall, reinforce, and shed light on the concepts and methods taught on lectures);
- *lab work* (students will learn state of the art software for data collection and analysis).

Načini ocenjevanja:

Način:

- pisni izpit
- seminarska naloga

Delež (v %) /

Weight (in %)

Assessment:

Type:

- written exam
- seminar work
