**Nosilec predmeta / Lecturer:** izr. prof. dr. Tea Golob

**Jeziki / Languages:**

**Predavanja / Lectures:** Slovenski, angleški / Slovene, English  
**Vaje / Tutorial:** Slovenski, angleški / Slovene, English

**Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:**

Pogoj za vključitev v delo je vpis v 2. letnik študija.  
Brez posebnih pogojev.

**Prerequisites:**

The prerequisite is enrolment into the second year of the study.  
No special prerequisites.

**Vsebina:**

Predmet predstavlja praktično pripravo na izvedbo raziskovalne naloge za potrebe magistrske naloge. Pri predmetu študent(ka) izvaja zapletenejše raziskave v okviru projektov za rešitev kompleksnejšega teoretičnega ali empiričnega problema, skozi katero težimo k poglobitvi in kritičnemu ovrednotenju do sedaj pridobljenih teoretičnih in metodoloških znanj.  
Študentje na začetku predavanj v sodelovanju z izvajalcem predmeta in

**Content (Syllabus outline):**

The course represents the practical preparations for carrying out the research work for the master thesis. In this course, the students implement advanced research techniques for solving the complex theoretical or empirical problem. Its purpose is to deepen and critically evaluate theoretical and methodological skills prior to this course.

Students at the beginning of the lectures - in collaboration with the course provider

povabljenimi vodji raziskovalnih projektov izberejo raziskovalne projektne naloge iz področja, ki jih strokovno najbolj zanima in izvedejo raziskovalne korake oziroma ekspertizo, ki vključuje:

- oblikovanje raziskovalnih vprašanj in hipotez, konceptov in teorij,
- izbor raziskovalnih strategij,
- organizacijo in izvedbo, raziskovalnega projekta,
- interpretacijo kompleksnih rezultatov in prenos v prakso.

and invited leaders of the relevant research projects - select research projects from the areas which are of their interested and implement research steps or expertise, which includes:

- developing research questions and hypotheses, concepts and theories,
- selection of research strategies,
- organization and implementation of research project,
- interpretation of complex results and transfer into practice.

### **Temeljni literatura in viri / Readings:**

- Wayne C. Booth et al. (2024): *The Craft of Research, Fifth Edition* (Chicago Guides to Writing, Editing, and Publishing) Fifth Edition. University of Chicago Press
- John W. Creswell & J. David Creswell (2018): *Research Design: Qualitative, Quantitative, and Mixed Methods Approaches 5th Edition*. SAGE Publications, Inc
- Inger Mewburn et al. (2018): *How to Fix Your Academic Writing Trouble: A Practical Guide*. Open University Press
- Umberto Eco (2015): *How to write a thesis*. Mit Press.

### **Cilji in kompetence:**

*Učna enota prispeva k razvoju naslednjih splošnih in predmetno specifičnih kompetenc:*

- uporaba metodoloških orodij – izvajanje, koordiniranje in organiziranje raziskav, uporaba raznih raziskovalnih metod in tehnik;
- sposobnost pridobivanja, selekcije, ocenjevanja in umeščanja novih informacij in zmožnost interpretacije;
- sposobnost sinteze izvernih idej, konceptov in rešitev določenih problemov;
- poznavanje in razumevanje procesov raziskovanja in sposobnost njihove kompleksne analize;
- razvoj veščin in spretnosti pri uporabi znanja za reševanje teoretičnih ali empiričnih raziskovalnih problemov;
- uporaba in kombiniranje znanj iz različnih disciplinarnih področij;
- sposobnost za reševanje konkretnih projektih nalog z uporabo znanstvenih metod in postopkov.

### **Objectives and competences:**

The instructional unit contributes to the development of the following general and subject-specific competences:

- use of methodological tools - implementation, coordination and organization of research, the use of different research methods and techniques;
- the ability to obtain, select, evaluate and place new information and the ability to interpret the research problem;
- competence to form original ideas, concepts and solutions for specific problems from different disciplines;
- familiarity with and understanding of processes of research and competence for their complex analysis;
- the development of skills and abilities for the use of knowledge to solve theoretical or empirical research problems;
- use and combination of knowledge for various disciplinary fields;
- the ability to solve project tasks with the use of scientific methods and procedures.

**Predvideni študijski rezultati:**

Znanje in razumevanje:

*Študent/študentka:*

- zna oblikovati relevantno raziskovalno vprašanje na temelju predstavljenega kompleksnega problema
- v bibliografskih bazah in bazah podatkov zna poiskati ključne koncepte in teorije, s katerimi pripravi konceptualni okvir raziskave oziroma ekspertize
- izvede raziskovalni postopek – od operacionalizacije in izbora raziskovalne metode do zbiranja, analize in interpretacije podatkov pod vodstvom izvajalca predmeta ter okriljem vodje raziskovalnega projekta, ki usmerja raziskovalni proces in mentorira študente
- iz analize zna izluščiti rešitev teoretičnega problema ali oblikovati predloge za reševanje kompleksnejših empiričnih problemov
- je vključen v domači ali mednarodni raziskovalni projekt, ki se izvaja na fakulteti ali drugih izobraževalnih ali raziskovalnih institucijah ter na koncu prejme ustrezno potrdilo o opravljenih nalogah in pridobljenih kompetencah s strani vodij projektov oziroma fakultete

**Intended learning outcomes:**

Knowledge and understanding:

The student will be able to:

- formulate relevant research questions based on the present complex problem
- search bibliographic databases to find the key concepts and theories to prepare the conceptual framework of research and expertise
- carry out the research process - from operationalization and selection of research methods to the collection, analysis and interpretation of data under the leadership of the course instructor and the auspices of the research project leader, who directs the research process and mentors the students
- know how to extract from the analysis of the theoretical problem to formulate proposals for solving complex empirical issues
- was involved in a national or international research project carried out at the faculty or at other educational or research institutions and at the end receives an appropriate certificate of completed tasks and acquired competences by the project managers or the faculty

**Metode poučevanja in učenja:**

- na začetku *kratka predavanja* z aktivno udeležbo študentov (diskusija, vprašanja, primeri, reševanje problemov)

**Learning and teaching methods:**

- starting with the lectures with active participation of students (discussion, questions, examples, problem solving)
- individual and group consultations (discussion, additional explanation deals with specific issues)

<ul style="list-style-type: none"> <li>• individualne in skupinske <i>konzultacije</i> (diskusija, dodatna razlaga, obravnava specifičnih vprašanj)</li> <li>• <i>seminarske vaje</i> (refleksija izkušenj, projektno delo, timsko delo, metode kritičnega mišljenja, diskusija, sporočanje povratne informacije, socialne igre);</li> <li>• <i>raziskovalno delo</i> (z letnim programom je določena ena ali več raziskovalnih tem glede na usmeritev raziskovanja in tekoče raziskovalne projekte)</li> </ul>	<ul style="list-style-type: none"> <li>• tutorials (reflection on experiences, project work, team work, critical thinking, discussion, feedback, social games);</li> <li>• research (the annual program has defined one or more research themes in relation to the direction of research and ongoing research projects)</li> </ul>
