Temeljni literatura in viri / Readings:

- Samuelson P.A., W. Nordhaus (2002): Ekonomija. Ljubljana: GV založba; Posušje: Mate.

Cilji in kompetence:

Učna enota prispeva k razvoju naslednjih splošnih in predmetno-specifičnih kompetenc:

- poznavanje in razumevanje družbenih procesov ter sposobnost za njihovo analizo, sintezo in

Objectives and competences:

The instructional unit contributes to the development of the following general and subject-specific competences:

- familiarity with and understanding of social processes and competence for their analysis, synthesis and

- reševanje njihovih posledic
- obvladanje raziskovalnih metod, postopkov in procesov
 - razvoj (samo)kritične presoje
 - sposobnost fleksibilne in aplikativne uporabe teoretičnega znanja
 - sposobnost za reševanje konkretnih družbenih in delovnih problemov z uporabo družboslovnih znanstvenih metod in postopkov
 - sposobnost pridobivanja, selekcije, ocenjevanja in umeščanja novih informacij in zmožnost interpretacije v kontekstu družboslovja
 - razumevanje in uporaba metod kritične analize in njihova uporaba v reševanju konkretnih družbenih in delovnih problemov
 - razvoj veščin in spretnosti pri uporabi znanja na področju družbenih ved s pomočjo reševanja teoretičnih ali empiričnih problemov

- prediction of solutions as well as consequences thereof
- competence in research methods, procedures and processes
 - development of (self)critical judgement
 - ability to flexibly apply knowledge in practice
 - competence for solving actual social and work problems with the use of social scientific methods and procedures
 - the ability to acquire, select, evaluate and place new information and the ability to interpret within the context of social sciences
 - understanding and use of methods of critical analysis and their use in the solving of actual social and work problems
 - development of abilities and skills for the use of knowledge in the field of social sciences with the aid of solving theoretic or empirical problems

Predvideni študijski rezultati:

Znanje in razumevanje:

Študent/študentka:

- pozna in razume osnovne ekonomske probleme in načine njihovega obravnavanja ter obvladovanja
- demonstrira sposobnost identifikacije, stvarnih ekonomskih problemov v okolju in zavzemanja stališč do njihovega reševanja
- prikaže poznavanje ključnih etičnih vprašanj delovanja sodobnega gospodarstva in lahko kritično ovrednosti načine reševanja oziroma oblikovanja politike
- pozna in uporablja osnovne metode in postopke načina ekonomskega razmišljanja in raziskovanja

Intended learning outcomes:

Knowledge and understanding:

The student:

- knows and understands work of basic economic problems and ways of dealing with them and managing them
- demonstrates the ability to identify real economic problems in the environment and to take a stance towards their solution
- shows the knowledge of key ethical issues of functioning of contemporary economy and is able to evaluate critically the ways of solving them or forming policy
- knows and uses fundamental methods and procedures of economic thought and research

Metode poučevanja in učenja:

- *predavanja* z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov)
- *seminarske vaje* (refleksija izkušenj, projektno delo, timsko delo, metode kritičnega mišljenja, diskusija)
- individualne in skupinske *konsultacije* (diskusija, dodatna razlaga, obravnava specifičnih vprašanj)

Learning and teaching methods:

- *lectures* with active student participation (explanation, discussion, questions, examples problem solving)
- *seminars* (reflexion about experiences, project work, team work, method of critical thinking, discussion)
- individual and group *consultations* (discussion, additional explanation, treatment of specific questions)

Delež (v %) /

Weight (in %) **Assessment:****Načini ocenjevanja:**
